

### North Country Chapter:

The North Country started in 1997 and like the CA Seagulls; they are a small chapter packed with fun. Many of their members also belong to other New England chapters, but this is a community chapter -they welcome visitors and encourage SMART members and interested persons to contact them about joining. Their musters include campouts, and visiting surrounding areas, luncheons, and staying in touch via newsletters. Many, if not all the SMART chapters stay connected this way, so living in the south and being a part of a chapter in a different region is not unique. You will find that many members have friends across the states simply by associating in SMART. And what better way to run across an old friend or shipmate. Like any chapter in SMART, contact the national office, the Region Director or Chapter President for more information on joining SMART or attending a muster.
