

NW SMART's Chapter:

Our members along with members of the other chapters in the NW region are always finding exciting places to 'muster', and we usually have members from other chapters along with us. Some of the fun places we have been to include Wapiti Elks Park, Land Yacht Harbor, but not all places we visit are 'campouts', for this particular occasion we visited the Grand Coulee Dam - what an amazing Dam, especially when they played their laser show across the dam as 11 spillways opened giving the show a white background. It was choreographed with sound and music. Several of our members stayed in local hotels in the area just so they could attend with the group. While some head to the south for the winter many southwest members head to the northwest for the summer. We welcome them and any SMART member who happens to be in our area. For more information on any of our chapters or on the 2009 National Muster, contact any of the North West chapter presidents, or the Region Director Ken Mayhew.
